

ROMAN DRAKE

AI-ASSISTED WEB APPLICATION DEVELOPER • PYTHON & DJANGO SPECIALIST

Indianapolis, IN Available upon request roman.drake.7@gmail.com linkedin.com/in/roman-drake-618860186

PROFESSIONAL SUMMARY

Full-stack web developer who designs, builds, and ships robust web applications end to end, from UI to database. Independently delivered three live production sites, including a client-facing invoicing platform, using Python/Django, React, and modern JavaScript. Backed by five completed credentials spanning front-end, back-end, and UX design, including Meta's Front End and Back End Developer specializations. Works efficiently across the entire stack, brings a strong eye for responsive, polished interfaces, and integrates AI-assisted tooling (like Claude, prompt engineering, and LLM API orchestrations) to construct codebases rapidly with modular correctness. Authorized to work in the US for any employer.

TECHNICAL SKILLS

Languages: JavaScript, Python, C#, HTML5, CSS3, SQL,

JSON

Databases: MySQL, Microsoft SQL Server, SQLite, Post-

greSQL

Frontend: React, Bootstrap, Tailwind CSS, GSAP, Responsive

Web Design

Tools & Practices: Git, GitHub, Postman, Visual Studio, SDLC,

Unit Testing, SEO, CMS

Backend & Frameworks: Django, ASP.NET, .NET, Node.js,

REST APIs

AI Collaboration: Claude & ChatGPT Prompt Engineering, AI

Coding Assistants, LLM Integration

SOFTWARE ENGINEERING PROJECTS

Invoice Manager

Python, Django, SQLite, Tailwind CSS

- Built a custom billing web application for landscaping operations, enabling automated invoice generation and automated email delivery.
- Designed an elegant client dashboard with Tailwind CSS and established robust server-side data persistence with Django and SQLite.
- Deployed and actively maintained the application on Render, ensuring fast loading and constant uptime.

SmallScapes

Python, Django, SQLite, Bootstrap

- Built a full-stack website for a small-scale landscaping business to display active portfolios and gather high-quality residential customer leads.
- Programmed robust data models and view logic within Django, supporting smooth data entry and automated notification emails.
- Optimized application and images for enhanced search engine ranking and page load performance.

ROMSITES

JavaScript, HTML5, CSS3, Bootstrap, GSAP

- Designed and coded a full marketing platform from scratch to showcase developer capabilities and secure client freelance agreements.
- Integrated customized GSAP timelines and responsive CSS interactions to establish high-fidelity, polished, and memorable visuals.
- Set up analytics tracking and lead capture flows to turn visitors into active clients.

| WORK HISTORY

Assembler IV • Allegion

June 2021 – June 2022 | Indianapolis, IN

- Performed meticulous assembly and thorough quality audits on complex physical security hardware on a main packing line.
- Prepared and packaged finished devices for shipment under tight delivery deadlines, ensuring error-free accuracy.

| EDUCATION

High School Diploma

Arsenal Technical High School, Indianapolis, IN
Graduated June 2020

| CREDENTIALS

Generative AI Software Engineering (July 2026)
.NET Full-Stack Developer Academy (Jan 2025)
Google UX Design Specialization (Jan 2025)
Meta Back-End Developer Certification (Nov 2024)
Meta Front-End Developer Certification (June 2024)
